

Your board wants an answer on AI risk. Your regulators expect governance evidence. Most assessments take months and end in a framework binder nobody reads. This one takes two weeks, ends in a board-ready report, and starts at \$10,000.

Report After Fieldwork

Board-Ready

Deliverable, Not a Binder

WHAT'S INCLUDED

AI System & Shadow AI Inventory Every sanctioned and unsanctioned AI tool, agent, and integration touching your environment — mapped, not estimated.	NIST AI RMF + ISO 42001 Gap Assessment Governance maturity evaluated against the two frameworks enterprises and regulators are standardizing on.
Data & Model Exposure Review Where sensitive data enters, moves through, and exits your AI systems — training data, inference-time exposure, and output risk.	Governance Controls Review Acceptable use policy, AI vendor risk process, and cross-functional ownership across Cyber, Legal, Risk, and Data.
Board-Ready AI Risk Report Delivered within 24-48hrs of fieldwork completion, written for your board and executive leadership — not just your security team.	Prioritized Remediation Roadmap Findings ranked by business impact, ready for your team or as the scoping input for a follow-on engagement.

HOW IT WORKS

WEEK 1 Discovery & Mapping ▶ AI & shadow AI inventory ▶ Non-human identity discovery ▶ Stakeholder interviews ▶ Framework baseline scoping	WEEK 2 Assessment & Reporting ▶ NIST AI RMF / ISO 42001 gap scoring ▶ Data & model exposure analysis ▶ Board-ready report drafted ▶ Findings walkthrough with your team
--	---

WHY SYMOSIS

▶ Practitioners, Not Framework Readers Our team has led ISO 42001 implementations in production and deployed NIST AI RMF in enterprise environments — not read about them.	▶ Assess and Implement — Same Team The senior practitioners who run your assessment build the programs that address it. No handoff. No junior staff at any point.	▶ Board-Fluent, Technically Deep Our consultants regularly present to Audit Committees and executive leadership — translating technical AI risk into fiduciary impact.
--	---	--

\$10,000 starting price covers organizations with up to 25 AI systems/tools in scope within a single business unit. Larger or multi-entity environments are scoped individually after a brief intake call. This assessment frequently serves as the diagnostic phase for our ISO 42001 Readiness, AI Red Teaming, or AI Governance Engineering programs.
